Casting Data

int to String Conversion

- There are multiple ways to convert an int to a String.

- You can use "Integer.toString(int)"

- For example:

```
int num = 9;
String str = Integer.toString(num); //str is '
```

- You can also use "String.valueOf(int)"

- For example:

```
int num = 9;
String str = String.valueOf(num); //str is "9"
```

String to int Conversion

- To convert a String to an int in Java, use "Integer.parseInt(str)"

- For example:

```java
String str="0";
int num = Integer.parseInt(str); //num is 0
```
